Dear Business Owner:

The Business Recovery Grant\Loan program is here again to assist small businesses in its recovery by offering needed capital for the purchase of equipment and or operational expenses.

Our firm has been selected and approved as a technical assistance provider(TAP) for the Business Recovery/Grants Program(BRGL). \$1,000 to \$100,000 is now available for new equipment purchase or existing operational expenses. The funds provider will need your company's past and current financial data and other key information about your business for qualification.

To ensure the application process goes smoothly, we need to collect all required information about your business by having all the items in the checklist available at your appointment. These items will help us serve you more efficiently and reduce your processing time. If you do not have all or some of the required information, please let us know, we can prepare a BRGL package for you.

If you have any questions about applying, the **Frequently Asked Questions** may provide some answers for you or you may contact us directly at (504)245-1741.

Thank you.

George W. White, Jr.
Accountant.
